CAREER OBJECTIVE

My career goal is to become an outstanding software developer, creating high-quality applications and contributing to the company's growth. I have a passion for programming and continuously strive to improve my skills. I aim to secure a position that offers a competitive income commensurate with my abilities and experience, while also being recognized for my achievements in the workplace.

EDUCATION

05/2011 - 05/2016	**University of Science - VNUHCM** Bachelor of Science in Information Technology

WORK EXPERIENCE

07/2022 - 08/2023	**German Software Intelligence LLC** Technical Leader I have conducted research to develop solutions for expanding features within BIM drawing construction applications. My work involved supporting programmers in approaching emerging technologies, refactoring and optimizing code, and establishing an internal ERP system. • Team size: 15 • Programming Languages: Python, C#, and JavaScript. • Integration Systems: PowerBI and SDS2 for integrating data visualization and structural steel detailing into the application. • Support Systems: Managed code repositories and project tracking using Bitbucket and Jira.
08/2021 - 07/2022	**DrKumo Inc.** Python Software Developer (Team Leader) I have experience in developing web services within the remote healthcare ecosystem, with a focus on integrating IoT devices for inventory management and establishing an internal ERP system encompassing Customer Relationship Management (CRM) and Human Resources (HR). • Team size: 7 • Programming Languages: Python and JavaScript. • Integration Systems:

- Employed Windows Active Directory for user authentication and access control.- Utilized RabbitMQ for message queuing and communication between different components.
  - Leveraged PostgreSQL for efficient data storage and retrieval.
- Support Systems: GitLab, Docker, Kubernetes, AWS.

05/2020 - 06/2021	**Viet Tinh Anh JSC** Senior Python Developer I have joined in developing web gateway services to seamlessly connect internal management systems with various e-commerce platforms such as Shopee, Lazada, Tiki, and logistics providers like Viettel Post and GHN (Third-Party Logistics). • Programming Language: Python. • Integration Systems: Microsoft Dynamic AX, Laravel, MSSQL Server and PostgreSQL. • Support Systems: GitHub, AWS.
04/2017 - 04/2020	**FEOS Software Ltd.** Python Developer I have actively contributed to various customer-driven application development projects, and here are some notable examples: • Asia Holidays Project: Tour Management Website - Developed a comprehensive website for managing ticket sales and tour bookings for Asia Holidays. - Programming Language: Python and JavaScript. - GitLab for version control. - Hosted the application on AWS. • We Deliver Project: F&B E-commerce System and Mobile Web Service - Played a key role in developing an end-to-end e-commerce system, including a website, mobile app, e-wallet, and payment gateway solution for the We Deliver chain of F&B stores. - Programming Language: Python and JavaScript. - Integrated the project with Google Cloud Platform (GCP) for efficient cloud-based services. - Integrated the OnePay Payment Gateway for secure and seamless payment processing. - Managed code repositories and collaboration using GitLab. - Hosted the application on AWS.
